## New Features and Enhancements

#393563 – Unable to email standard Purchase Order

When trying to email a Standard BC purchase order, the report failed due to a problem in our code.

This is now fixed and the following error will appear instead:

Error

An invalid argument was passed to a 'List' data type method.

#393646 – Update Permissions property on objects

Following a request from a customer, we have updated our permissions on some of our code units and reports.

Further updates will occur in the following releases.

#394051 – New report

We have added one new report to our report list: Assembly Order.

#395465 – Document Layout missing data in XML

Document Layout used to, at times, stop working in specific conditions, due to custom fields that are missing in the XML file. This created the wrong Layout on the Lasetnet report.

This issue is now fixed.

#395780 - Reminders' totals are incorrect

In versions 4.3.0.0 and 4.3.0.1, Reminders showed the wrong total amount.

This is now fixed.

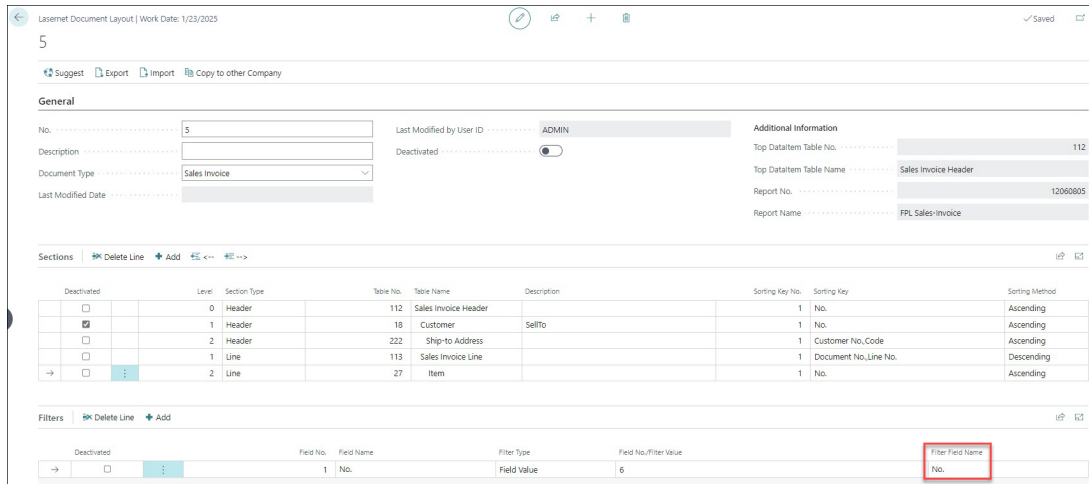

<b>Reminder</b>		Page 1 / 1
Document No. 105001		
Address Heading Guildford Water Department 25 Water Way Guildford, GU7 5GT Great Britain		
Date	Amount	Remaining Amount
.2024	0,00 5,00	666,75 0,00
<b>Total Amount</b>		<b>GBP 681,75</b>

#395797 - FooterInfo language to be taken from the document, not from setup

The code has been changed to allow the use of the language code from the report when creating the footer, instead of the language code from Lasernet Setup.

#395798 – Filter Field Name is not exported/imported for Document Layout Filter  
Our export/import framework did not cover Filter Field Name from Document Layout.

This is now fixed.

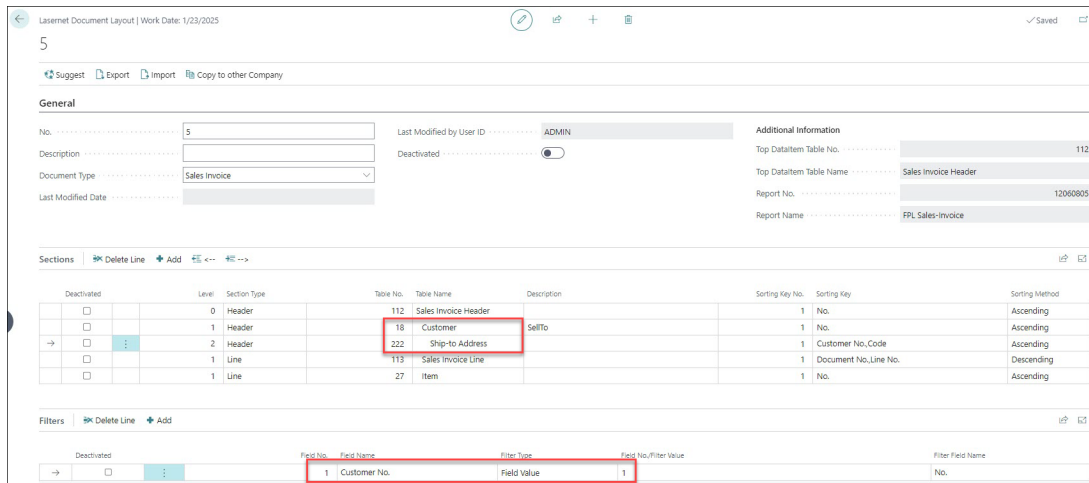

#395799 – Changing Table No. on Document Layout Line does not change Parent Table No. on child lines

When making a change to a table, for example renaming a Parent table Vendor instead of Customer, then the table lookup within filters still pointed to the old table.

The following example is table 222 (Ship to Address), which now has table 18 as parent.

Before changing the table name:

After adding a filter to table 222, the system showed Customer table.

**Fields - Customer** 🔍

No. ↑	Field Name	Field Caption	Type	Length
→ 1	No.	No.	Code	20
2	Name	Name	Text	100
3	Search Name	Search Name	Code	100
4	Name 2	Name 2	Text	50
5	Address	Address	Text	100
6	Address 2	Address 2	Text	50
7	City	City	Text	30
8	Contact	Contact	Text	100
9	Phone No.	Phone No.	Text	30
10	Telex No.	Telex No.	Text	20
11	Document Sending P...	Document Sending Profile	Code	20
12	Ship-to Code	Ship-to Code	Code	10
14	Our Account No.	Our Account No.	Text	20
15	Territory Code	Territory Code	Code	10
16	Global Dimension 1 ...	Global Dimension 1 Code	Code	20
17	Global Dimension 2 ...	Global Dimension 2 Code	Code	20
18	Chain Name	Chain Name	Code	10
19	Budgeted Amount	Budgeted Amount	Decimal	12
20	Credit Limit (LCY)	Credit Limit (LCY)	Decimal	12
21	Customer Posting Gr...	Customer Posting Group	Code	20
22	Currency Code	Currency Code	Code	10

OK Cancel

After changing the table name:
